i cant download this addon. Great Game only prob is when I download mods from Steam they dont show up in my game not good when you pay for them !

Locks. This DLC makes sugar beet harvesting more effective and more interesting!. Loving it, Now I can sell my other trackors and get 2 of the Terras. I have a reason to get into beet farming now. I rate 10V10.

I was hyped when I preorderd it. I was working my butt off to gather 1mill to be able to buy these items that come with this pack. (No not irl money) I just looked at the items today (3V10V2016 being the realess date.) and I was amazed of the detail. Running Every High graphics I must add. Now I get to show it off to my friends. (xD)

If you have not gotten it downloaded by now, restart steam, Or your pc.

~DeTurtle. great for the price for anyone that is tried of the same old vehicles and want to spice up there game. love it . There are many things to do in Farming Simulator 15 without the need for this DLC. Personally, I'm happy farming corn and wheat, with a mix of animals while I'm watching my crops grow. If I get tired of that, I dabble in forestry, as I edit most of my maps to have trees and grass in the fields, instead of them being ready to go once purchased.

I have over 700 hours in this game, and I've only planted sugar beets once. It just wasn't that much fun to me when I already loved what I had been doing.

I say all of the above to remind people on a tight budget that you don't really need this DLC. If you have fun in this game, you don't need to feel left out by not getting this mod. There has already been a good sugar beet harvester out for almost a year: <http://Vfs-uk.com/Vmods/view/36521/ropa-euro-tiger-v8-3-xl-pack>

[This mod does include more than just a sugar beet harvester though, and is a wonderful addition to the game if you already love to farm sugar beets. It has inspired me to vary my crops a bit more and is a joy to drive. It adds quite a bit more to the game than something like the New Holland bundle did. That DLC was nice, and gave more variation in equipment, but the new equipment didn't fit any new roles. It wasn't better, bigger or different than the Krone already in the game. I'm not complaining about that DLC. I love it, but I compare to say that the Holmer DLC is much better in that it adds a new brand and new equipment to the game.](#)

[.If you like beet harvesting, then this is for you. Even if you don't like beet harvesting you still get the 600 Eco which has lots of awesome capabilities ranging from pulling trailers to slurry application. A great DLC for all farming sim fans!. its a very good game but the dlc was late](#)

[. seems cool 10V10 would vehicle again...](#)

this is the coolest game to play
